Phosphoric Acid Storage Tanks.

ABOUT US

■ Company

With over 12 years of experience in phosphate products and an annual capacity of 20,000 tons, Chengdu Golden Raven Technology Co., Ltd. serves agricultural and industrial markets worldwide, focusing on consistent quality, stable supply, and long-term cooperation with partners across different regions, while maintaining a practical and steady approach to product development and market collaboration.

Drying Unit, Production Line 3

Phosphoric Acid Storage Tanks, IBC Phosphoric Acid Containers, Raw Material Warehouse

- 20+ Areas of Expertise:** Covering phosphate processing, quality control, and process optimization
- 30+ Technical & Engineering Staff:** With strong hands-on experience in production and operations
- Continuous Talent Development:** Integrating young professionals to support long-term capability growth

■ Teams

Production & Development

Our team consists of experienced production engineers and technical specialists, focusing on phosphate processing, quality control, and process optimization, ensuring stable production and consistent product quality.

Attracting Skilled Talent:

The company strengthens its technical capabilities by integrating skilled professionals and young talent, combining experience with new perspectives to continuously improve processes and product performance.

Working with the Industry:

Chengdu Golden Raven works closely with upstream and downstream partners, aligning production with market needs and supporting long-term, stable development.

GOLDEN RAVEN
SINCE 2014

■ Cultural Philosophy System

Customer needs are always put first, with quick response and proactive service. Every decision is made from the customer's perspective. Trust is earned through action.

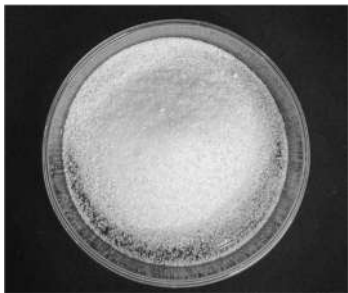

Quality is the bottom line and the best business card. From material selection to delivery, every step is strictly controlled. Standards are never sacrificed for efficiency.

Honesty and trustworthiness are the foundation of business. The spirit of contract is upheld, along with transparent cooperation - no exaggeration, no concealment. Lasting mutual benefit is built through long-term credibility.

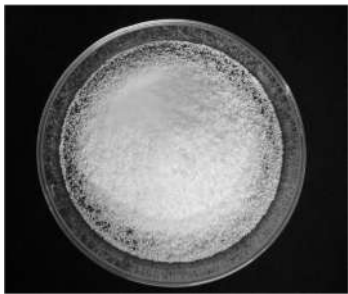

PRODUCTS

■ Core Product Lines

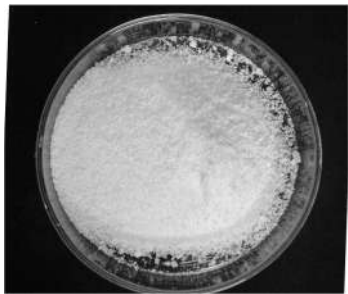

MKP (Monopotassium Phosphate)

0-52-34 · High-purity, fully water-soluble phosphate material with excellent stability and low impurity levels. Widely used in fertilizer systems, industrial processing, and specialty formulations where precise phosphorus and potassium input is required.

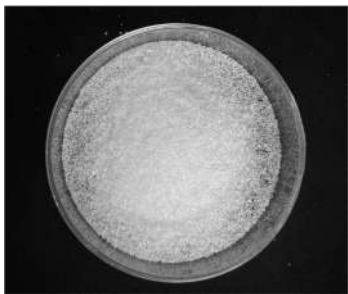

MAP (Monoammonium Phosphate)

12-61-0 · Concentrated nitrogen-phosphorus material with high nutrient efficiency and consistent quality. Suitable for fertilizer production, blending systems, and selected industrial applications requiring stable phosphate inputs.

UP (Urea Phosphate)

17-44-0 · Acidic, water-soluble phosphate compound combining nitrogen and phosphorus in a highly available form. Commonly applied in fertigation systems, industrial cleaning processes, and specialty formulations requiring pH adjustment.

DAP (Diammonium Phosphate)

21-53-0 · Water-soluble crystalline phosphate material with high nutrient concentration and stable composition. Applied in fertilizer production, industrial processing, and multi-industry systems requiring consistent phosphate supply.

■ Application Scope

Agriculture

Used in water-soluble and compound fertilizer systems, supporting efficient nutrient delivery and crop performance.

Renewable Energy

Applied in upstream material processing for energy-related industries, including lithium battery and specialty chemical systems.

Food/Feed Additives

Used as buffering agents, stabilizers, and nutrient sources in food processing and feed formulations under regulated standards.

Chemical Raw Materials

Applied across industrial systems such as water treatment, cleaning agents, and chemical processing as functional materials.

GOLDEN RAVEN H.K. CO. LIMITED

International Trading & Supply Chain Platform

■ Company Positioning

Golden Raven H.K. Co. Limited operates as an offshore trading platform based in Hong Kong, connecting China-based manufacturing with global markets. It focuses on the supply and distribution of chemical raw materials, particularly in the field of water-soluble fertilizer inputs and phosphate-based products.

■ Business Scope

The company is engaged in the international trade of phosphate-related and other chemical raw materials, covering water-soluble fertilizer inputs, basic fertilizers, and supporting materials. Its flexible trading structure enables efficient service across different regional markets.

■ Platform Value

Leveraging Hong Kong's position as an international trade hub, Golden Raven H.K. Co. Limited enhances flexibility in cross-border transactions, compliance handling, and logistics coordination.

This structure enables production resources to efficiently connect with global markets.

SUPPLY PORTFOLIO

Water-Soluble Fertilizer Inputs & Related Chemicals

The company offers a structured supply portfolio covering the key components of water-soluble fertilizer systems.

Rather than focusing on individual products, it integrates phosphate, nitrogen, potassium, and functional materials into a coordinated supply framework.

This approach supports stable sourcing, flexible formulation, and efficient supply across different market requirements.

Supply Reliability

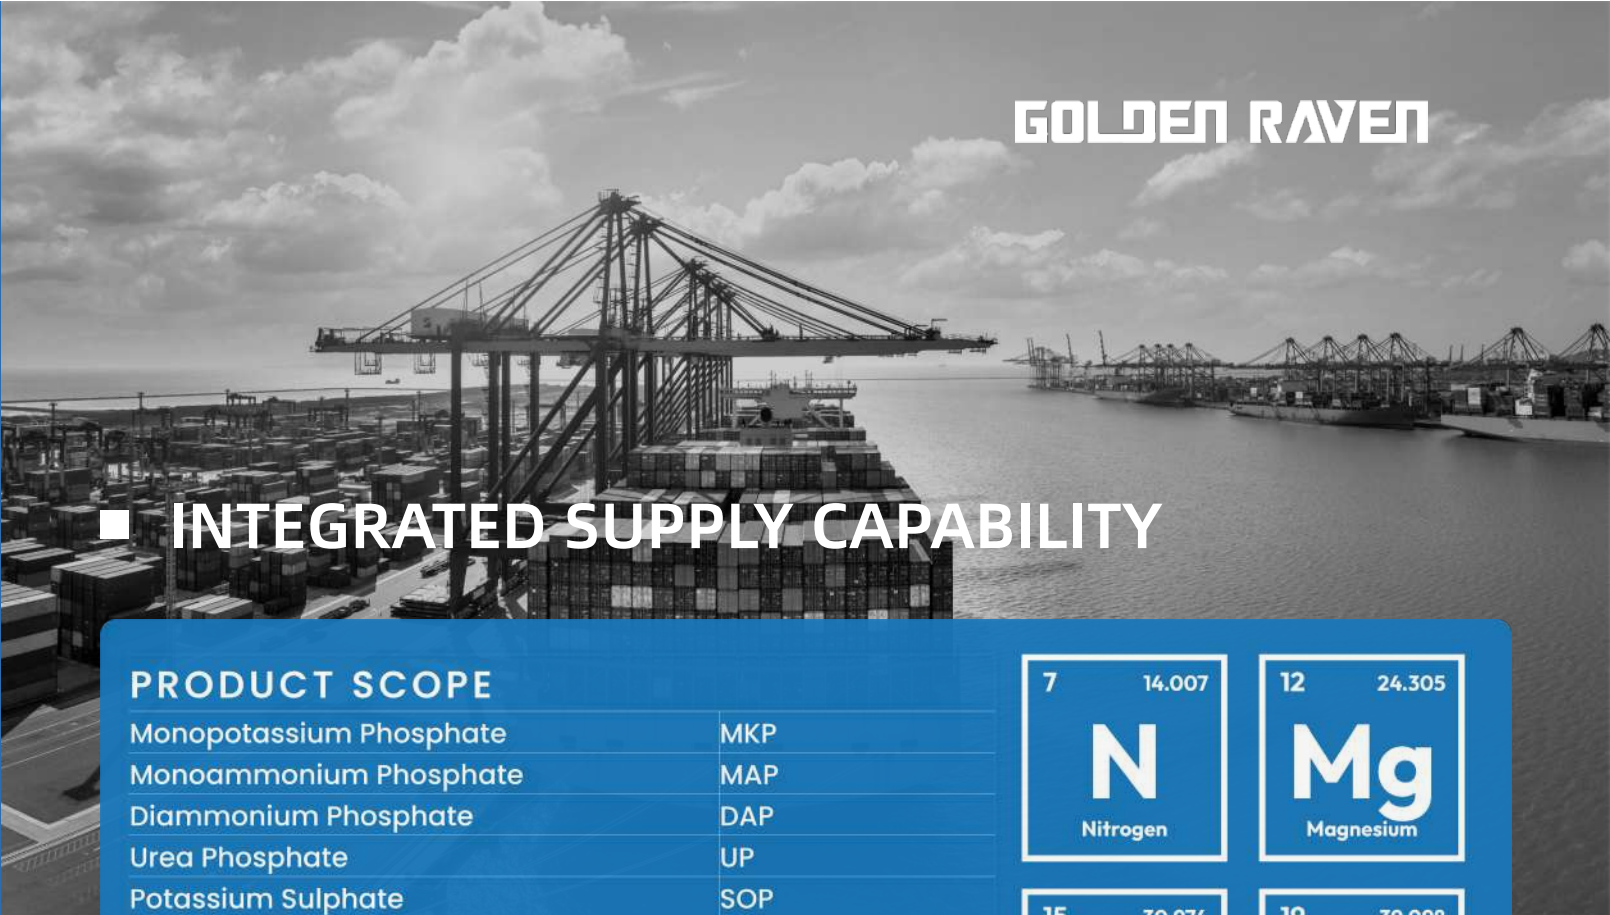

The company works with established production partners and maintains consistent quality standards across its supply chain. Through controlled sourcing and coordination, it ensures stable product availability and reliable delivery performance.

Market-Oriented Service

With a focus on international markets, the company provides responsive communication and flexible trade execution, adapting to different customer requirements and regional conditions.

GOLDEN RAVEN

■ INTEGRATED SUPPLY CAPABILITY

PRODUCT SCOPE

Monopotassium Phosphate	MKP
Monoammonium Phosphate	MAP
Diammonium Phosphate	DAP
Urea Phosphate	UP
Potassium Sulphate	SOP
Potassium Humate	K-Humic
Potassium Hydroxide	KOH
Potassium Fulvate	K-Fulvate
Manganese Sulphate Monohydrate	MnS-M
Zinc Sulphate Monohydrate	ZnS-M
Zinc Sulphate Heptahydrate	ZnS-H
Boric Acid	Boric Acid
Disodium Octaborate Tetrahydrate	DOT
Ferrous Sulphate Monohydrate	FeS-M
Ferrous Sulphate Heptahydrate	Fes-H
Potassium Nitrate	NOP
Calcium Ammonium Nitrate	CAN
Calcium Magnesium Nitrate	Cal-Mag
Ammonium Sulphate	AS
Magnesium Sulphate Monohydrate	MgS-M
Magnesium Sulphate Heptahydrate	MgS-H
Magnesium Nitrate Hexahydrate	MgN-H
EDDHA Fe 6% (o-o 1.2-5.2)	EDDHA Fe 6%
EDTA - 2Na	EDTA - 2Na
EDTA - 4Na	EDTA - 4Na
EDTA - CaNa2	EDTA - CaNa2
EDTA - CuNa2	EDTA - CuNa2
EDTA - FeNa	EDTA - FeNa
EDTA - MgNa2	EDTA - MgNa2
EDTA - MnNa2	EDTA - MnNa2
EDTA - ZnNa2	EDTA - ZnNa2
DPTA - FeHNa	DPTA - Fe 11%

714.007 N Nitrogen	1224.305 Mg Magnesium
1530.974 P Phosphorus	1939.098 K Potassium
1632.065 S Sulfur	3065.380 Zn Zinc
510.811 B Boron	2655.845 Fe Iron
2554.938 Mn Manganese	612.011 C Carbon
2040.078 Ca Calcium	2963.546 Cu Copper

GLOBAL OPERATIONS & STRUCTURE

Structured Supply. Consistent Execution.

Global Market Coverage

Business presence across East Asia, Southeast Asia, India & Pakistan, the Middle East, Central Asia, South America, North America, Europe, East Africa, and Australia.

Stable Supply Structure

Supported by long-term cooperation with production partners, ensuring consistent product availability and supply continuity.

Operational Consistency

Annual shipment volume exceeds 30,000 MT, with established operational experience across different markets.

Long-Term Partnerships

A significant portion of customers have maintained cooperation for over three years, reflecting stable and ongoing business relationships.

OPERATIONAL OVERVIEW

A Structured and Reliable Supply Network

The company operates with a structured supply and trading model, integrating production resources with international market demand.

Through consistent execution across different regions, it maintains stable supply performance and adapts to varying regulatory and logistical environments.

Rather than pursuing rapid expansion, the focus remains on building a reliable and sustainable international supply network.

40,000+ MT

Annual Shipment Volume
